

STEWARD INTERNATIONAL ENHANCED INDEX FUND

INSTITUTIONAL CLASS SHARES

INVESTMENT OBJECTIVE

To provide long-term capital appreciation.

INVESTMENT STRATEGY

- Investments consistent with Biblical principles and a Christian lifestyle.
- International approach - Investing primarily in American Depository Receipts (ADRs) of companies located in both developed and emerging markets.
- The application of cultural values screening policies designed to avoid investing in companies materially involved with pornography, abortion, alcohol, gambling or tobacco.

INVESTMENT PROCESS

The Fund employs a three-step process that combines risk controlled portfolio construction and cultural values screening policies.

1. Determine the percentage of the Fund's assets that will be allocated to both developed and emerging market asset classes. These allocations will vary with market conditions.
2. The international equity universe is screened in accordance with the Fund's cultural values policies, and those companies failing to meet these criteria are removed. The developed and emerging market components are identified within the investment universe.
3. By using optimization techniques, construct a risk controlled portfolio that is designed to track the targeted international allocation.

PORTFOLIO MANAGER

The Fund's portfolio manager is John R. Wolf. John is a Senior Vice President of Capstone Asset Management Company and a member of the Firm's investment team. He received his MBA from Manhattan College and BBA from Hofstra University. John began his career in 1983 and has over 20 years of experience in the financial services industry.

Risk Factors: *The Fund may not achieve its stated investment objective. Please be aware that the Fund may be subject to certain additional risks such as Cultural Values Screening and Foreign Securities Risk. The Fund may not achieve the same level of performance as it would have without the application of the Cultural Values Screening policies. Investments in foreign securities may involve greater risk, including political and economic uncertainties of foreign countries as well as the risk of currency fluctuations. Please see the Fund's prospectus for a further explanation of these risks. ADRs are certificates representing home market securities and provide U.S. investors with a way to invest in non-U.S. securities without leaving the country.*

MANAGING WEALTH
PROTECTING VALUES

FAITH-BASED SCREENING METHODOLOGY

The Fund uses CFS Consulting Services, LLC (CCS) as its provider of cultural values research data in the screening of securities. Management at CCS were pioneers in the initial development of values-based investing in the mid 1990's. Their experience includes having started an investment research firm dedicated to values-based investing data and analysis in 1996.

The Fund applies a comprehensive set of cultural values screens to all of the investments. Screens applied to the portfolio management process allow investors to avoid owning securities in companies that choose to profit from businesses that are at odds with values consistent with a Christian lifestyle.

The Fund applies strict exclusionary screens to companies involved in the businesses of abortion and pornography. In addition, the Fund screens for businesses that are principally involved in gambling, or the manufacturing of alcoholic or tobacco products. The Fund employs only avoidance screens and does not dilute the portfolio by seeking to invest in companies that promote any individual cultural or social issue.

This methodology gives the Fund the ability to serve a rapidly growing number of investors seeking competitive investment returns without compromising their personal convictions.
